1. Between 4 and 7 August 1953, all standard- and narrow-gauge freight cars operating in East Germany were recorded. Freight cars operating abroad during the period mentioned were recorded while re-entering East Germany between 8 August and 31 October. The inventory was prepared by special commissions formed at the Ministry of Railroads, the railroad district headquarters, and railroad offices. All personnel involved in taking the inventory were made familiar with procedures to be followed. After the completion, all records were transmitted for evaluation to a commission in Leipzig-Wahren, which eliminated all double-recording and other unclear points.

2. The inventory had the following result:
